 4th, No.7B, Theinni Street, Kyee Myin Daing, Yangon.

### MY PORTFOLIO

 <https://hmlwh.netlify.app/>

### EDUCATION

2017 - 2020

TECHNOLOGY UNIVERSITY (LKW)

- 3rd B.E

2022-2023

JAVA DEVELOPER CLASS

- Studied Java Programme Course

### LANGUAGE

- English (B2)
- Burmese (Native)
- Japanese (N4)
- Korean (Basic)

### SKILL

- Problem Solving
- Public Relations
- Teamwork
- Time Management
- First Learner
- Creativity

---

## SUMMARY

Skilled in Angular, Ionic, TypeScript, JavaScript, HTML, CSS, and libraries like Bootstrap, Angular Material, and PrimeNG. Experienced with RxJS and NgRx for efficient state management, API integration, and delivering dynamic, scalable applications focused on performance and security. Proficient in implementing Firebase push notifications for real-time engagement and using code obfuscation for enhanced security.

Detail-oriented and passionate, with a strong background in building responsive solutions and optimizing UI/UX design. Experienced in collaborating with cross-functional teams using Agile processes, including sprint planning, to develop high-quality applications. Committed to continuous learning and innovation, staying up-to-date with emerging technologies to create impactful digital solutions.

## WORK EXPERIENCED (MAINLY PARTICIPATED PROJECTS)

**KACE - KBZMS Automatic Claim Essential (Myanmar)** <https://kace.kbzms.com/>

- The Claim System App is designed for motor vehicle and comprehensive motor insurance. It allows customers to file accident claims and enables surveyors to assess accident sites and report findings to the head office efficiently. This system includes a Surveyor Portal Website for streamlined claim processing.

**E-Claim User App (Myanmar)** <https://customercare.kbzms.com>

- This is the user-facing front-end for KACE, available on both web and mobile (iOS & Android). It allows users to view their insurance policies and submit claims for vehicle damage, ensuring a seamless and accessible claims process.

**MediCubo Crypto Wallet PWA (Thailand)** <https://r2e.fun/>

- The MediCubo Crypto Wallet (R2E) rewards recycling with points convertible to NFTs or cash. It also offers eco-friendly loans, allowing users to leverage points or crypto as collateral through secure smart contracts, promoting sustainability and financial empowerment.

**T2K K-Pop Audition App (Thailand And Korea) - Progress In UAT**

- Our mobile platform offers a unique audition experience where contestants upload videos, and users engage by voting and purchasing merchandise. Users can earn V Points through shopping for related products or watching ads, which can then be used to vote and support their favorite contestants. This creates an interactive mix of entertainment, shopping, and fan participation.

**INSPEER - Admin Portal (Myanmar) - Progress In UAT**

- INSPEER is a comprehensive insurance digital core platform designed to streamline operations and accelerate product launches. With features like real-time logic configuration, dynamic workflow management, AI-powered automation, and advanced analytics, it empowers insurers to stay competitive and efficient. Future-ready and scalable, INSPEER adapts to the needs of insurers of all sizes.

## Experienced external libraries

I integrated Js PDF, Pdf Make, Excel Js, and Apex Charts for document generation and data visualization, and Google Maps for geolocation. I enhanced user engagement with Webcam, QR Scan/Code, Image Resolution, and Push Notifications. For multimedia and seamless browsing, I implemented 2C2P Integration, YouTube Player, In-App Browser, Swiper, and Carousel. Additionally, I used ngx-libraries and Material Library for dynamic UI and NgRx and RxJS for efficient state management and data handling.
